Practice produces evidence, not mythology

Rehearsal objectives, procedures, results, failures, blockers, and unresolved questions are published from actual artifacts.

F# generated | Static first | Printable

> Claims change state only when their evidence supports the transition.

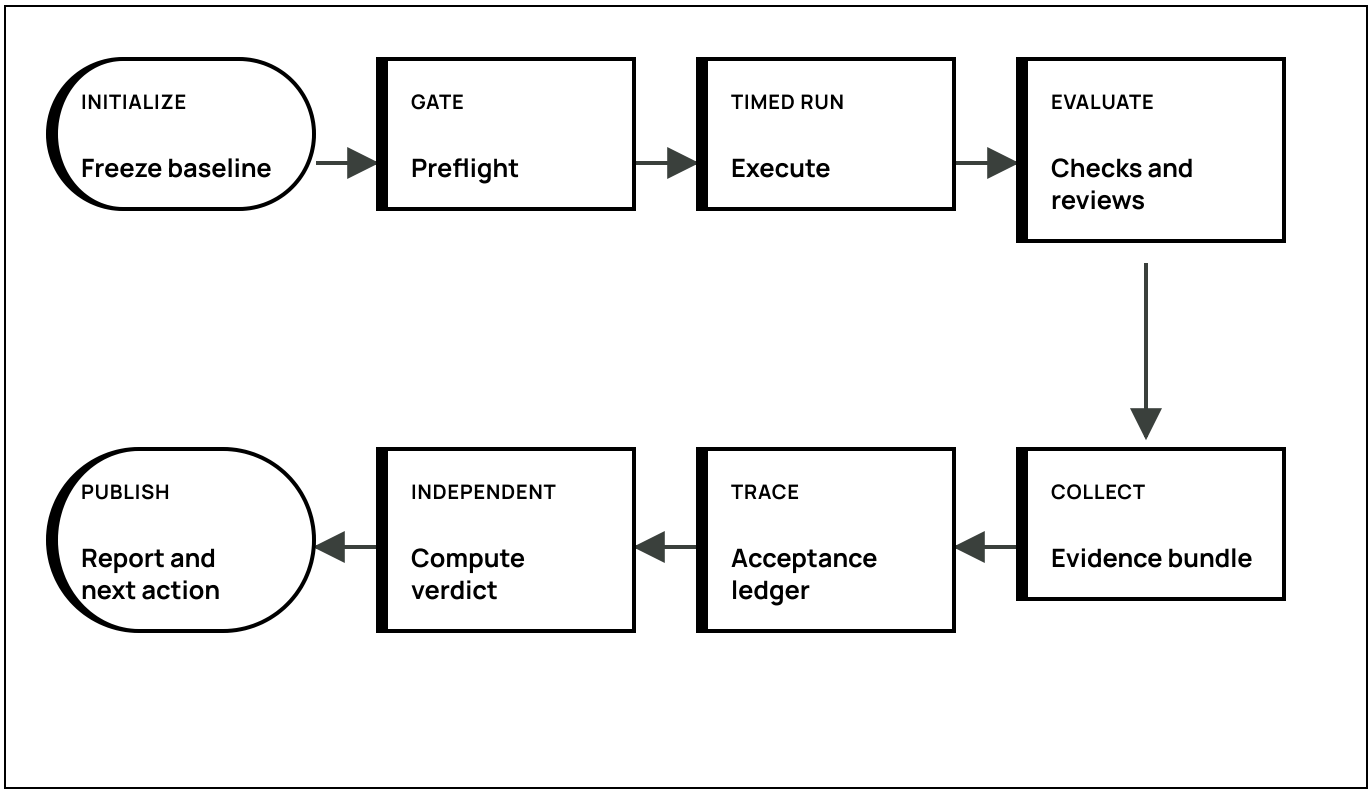

D05 · REHEARSAL WORKFLOW

Acceptance is computed, not asserted

The workflow binds requirements, candidates, checks, evidence, and verdict to exact revisions.

D05 — Indy Init rehearsal workflow

The verdict is computed from revision-bound evidence. Missing evidence remains NOT_RUN; it is never converted into success.

1. The requirement baseline, dependency lock, interfaces, scope decisions, and clock are frozen before execution.
2. Preflight establishes readiness; the timed execution produces candidates and checkpoints.
3. Tests, live checks, and independent reviews produce revision-bound evidence.
4. The evidence manifest feeds a per-requirement, per-gate acceptance ledger.
5. An independent verifier computes the verdict from trusted inputs; the agent does not write an acceptance result.
6. The final report preserves failures, blockers, measurements, unknowns, and the next action.

INDY INIT

Rehearsal evidence without retrospective certainty

The timeline separates a published failed run, an unmeasured repository, and the future demonstration.

✓ Documented

Competition requirements

Indy Init revision ad87474d… owns the requirement package, gate model, verifier, and acceptance predicate.

• FAILED

Rehearsal 4

The final candidate was not accepted: 1 of 108 P0 requirements passed, 9 failed, 98 were not run, and D-HIST-WASM stayed open. Read the source report.

• NOT RUN

Rehearsal 5

The current revision contains no run evidence beyond its initial README. No comparison is possible yet.

• Not run

Indy Init demonstration - November 7, 2026

The event outcome cannot be reported before it occurs and is verified.

COMPARISON RULE

Only compatible measurements may be compared

Token counts, elapsed time, correctness, and gate outcomes need stable definitions and source-linked artifacts.

NO CROSS-RUN PERFORMANCE CLAIM

Rehearsal 4 measured elapsed time and acceptance, but not tokens or cost. Rehearsal 5 has no run evidence. The website therefore publishes no efficiency trend.
